Replace the original Abstract with the following new Abstract:

--A gas discharge lighting system includes a gas discharge lighting device, a source of input power, an electronic ballasting circuit having a regulated direct current requirement, and a light sensing device configured to detect an amount of illumination provided by the gas discharge lighting device and connected to a controlling device within the electronic ballasting circuit to allow the controlling device to maintain the amount of illumination at a preset level. The system further includes a fiber optic for conducting light from a user specified location outside the electronic ballasting circuit to the light sensing device which is mounted internally within the ballasting circuit.--;

Allowable Subject Matter

2. Claims 1 and 3-4 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or fairly suggest:

- A gas discharge lighting system comprising a light sensing device for sensing an amount of illumination provided by said gas discharge lighting device and connected to said controlling device to allow said controlling device to maintain the amount of illumination at a preset level, wherein said light sensing device being mounted internally within said ballasting circuit and including a fiber optic wire for conducting light from a user specified location outside said ballasting circuit to said internally

mounted light sensing device; and wherein said controlling device is a microprocessor coupled to said gas discharge lighting device to monitor the operation of said gas discharge lighting device and interconnected with said controllable output direct current-to-alternating current inverter, in combination with the remaining claimed limitations as called for in independent claim 1 (claims 3 and 4 are allowed since they are dependent on claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
